DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 6, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goto et al.

Goto et al. discloses an apparatus that determines a temperature of a thermal fluid ejection nozzle as the nozzle is fired and determines that the nozzle ejected fluid based on the temperature of the nozzle (Column 11, lines 24-30). Thus, the apparatus of Goto et al. is capable of carrying out the methods as recited. Regarding claim 13, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. The device of Goto et al. is capable of ejecting ink.

Allowable Subject Matter

3. Claims 2-5 and 7-12 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 14-25 are allowed.

Conclusion

Art Unit: 3752

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Privas and Franco et al. are pertinent to Applicant's invention.
